Table of Contents

Executive Summary 5
Pre-admin/admissions *7*
Procedure *7*
In-patient/out-patient Recovery *8*
Discharge *8*
Billing Revenue Cycle Management *9*
Methodology 9
Qualitative Research Summary 10
Workflow Mapping *10*
Key Workflow Processes 13
Process 1: Pre-Admission/Admissions *13*
Potential Manual/Paper-Based Processes 13
Assumptions 13
Process 2: Procedure *13*
Potential Manual/Paper-Based Processes 14
Assumptions 14
Process 3: In-Patient/Out-Patient Recovery *14*
Potential Manual/Paper-Based Processes 14
Assumptions 14
Process 4: Discharge *14*
Potential Manual/Paper-Based Processes 15
Assumptions 15
Process 5: Billing Revenue Cycle Management *15*
Potential Manual/Paper-Based Processes 16
Assumptions 16
Quantitative Results 17
Demographics *17*
Process 1: Pre-Admission/Admissions *23*
Equipment Used 23
Admissions Document Tracking 24
Information Collected During Pre-Admissions 25
Information Collected During Admissions 26
Information Submitted by Associated/Affiliated Physicians 27
Information Submitted by non-Associated/non-Affiliated Physicians 28
Information Submitted by Internal Hospital Departments 29
Submission of Admitting Information by Patients 30
How Submitted Documents Are Compiled 31
Process 2: Procedure *32*
Method of Providing Patient Information 32
How Coding for Billing is Documented for a Procedure 33

How Surgeons/Specialists Document their Procedures 34
Process 3: In-Patient/Out-Patient Recovery *35*
How a Patient's Information/Records Are Accessed 35
How Devices Are Shared for Accessing Patient Records 36
How Shift/Patient Instructions Are Provided to Nurses 37
How Many Staff Members on the Recovery Area/Floor 38
How Information is Recorded Into the Patient Record 39
How Doctors' Follow-up Work Orders Are Created 40
How Information or Clarification is Provided Regarding Coding/Billing Items 41
How Other Processes Are Recorded Into the Patient File/Record 42
Process 4: Discharge *43*
How Patient Discharge Orders Are Tracked and Recorded 43
How Doctors Commonly Create Follow-up Discharge Work Orders 44
How Records Are Provided To Patients when Transferred or a Copy is Requested 45
How Home Care Instructions Are Provided to the Patient 46
Process 5: Billing Revenue Cycle Management *47*
Coding Standard Facilities Are Using 47
How Coding Is Connected to the EMR/EHR System 48
Patient Case Billing 49
Declined Claims 50
Declined-Claims Investigation Tracking 51
Business Process Automation Opportunities *52*
Devices Used for Capture/Scan 52
How Many Print Devices 53
Importance of Care Objectives 54
Time-Intensiveness of Various Processes 55
Level of Automation 57
Improvements through Automation 59
Barriers to Automation 63
Conclusions and Recommendations 64
Opportunities for Automation *64*
Healthcare Objectives, Automation ROI's and Barriers *68*
Recommendations *68*
Appendix A – Healthcare Industry Solutions 70
EMR/EHR *70*
Patient Intake Software *73*
Healthcare Accounting/Billing Software *73*
Claims Software *75*
ECM/Document Management *76*

Figure 1: Key Paper-Intensive Processes for Healthcare....10
Figure 2: In-Patient Admissions Workflow....11
Figure 3: Outpatient Procedure and Post-Procedure Workflow....11
Figure 4: In-Patient Recovery....12
Figure 5: In-Patient Discharge....12
Figure 6: Business Process Automation Opportunities for Healthcare....16
Figure 7: Which of the following best describes the location where you primarily work?....17
Figure 8: How would you describe your position/role within your facility?....18
Figure 9: What is the primary area in which you work?....19
Figure 10: Which of the following devices do you use in your position?....20
Figure 11: Which of the following best describes you company's electronic medical/health records (EMR/EHR) system?....21
Figure 12: What is the name of your EMR/EHR system?....22
Figure 13: Which of the following devices do you use in your position?....23
Figure 14: How do you keep track of documents that are collected from patients?....24
Figure 15: Which of the following types of information do you collect during the pre-admittance stage?....25
Figure 16: Which of the following types of information do you collect during the admitting stage?....26
Figure 17: How do associated/affiliated physicians typically send admitting information?....27
Figure 18: How do non-associated/non-affiliated physicians typically send admitting information?....28
Figure 19: How do internal hospital departments typically send admitting information?....29
Figure 20: How do patients typically submit the following admitting information?....30
Figure 21: How do you compile these documents once they have been received from various sources?....31
Figure 22: What percentage of patient information is provided to surgeons/specialists in the following formats?....32
Figure 23: How is coding for billing completed for a documented procedure?....33
Figure 24: How do surgeons/specialists most commonly document their procedures once they have been completed?....34
Figure 25: When caring for the patient during recovery, how do you access the patient's information/records?....35
Figure 26: How are the devices that you use for accessing patient records shared?....36
Figure 27: How are shift/patient instructions provided to nurses?....37
Figure 28: How many of the following staff members work in your recovery area/floor? (Means)....38
Figure 29: How is the following information most commonly recorded into the patient record?....39
Figure 30: How are doctors' follow-up work orders created?....40
Figure 31: If the coding/billing department needs more information or clarification regarding an item in the system, how is it provided?....41
Figure 32: How are other processes (e.g., rehabilitation, diet) most commonly recorded into the patient file/record?....42
Figure 33: How are patient discharge orders tracked and recorded in the patient record system?....43
Figure 34: How do doctors most commonly create follow-up discharge work orders for patients?....44

Figure 35: If a patient needs his/her records transferred or requests a copy, how is this information provided? 45
Figure 36: How are home care instructions provided to the patient? 46
Figure 37: Which coding standard is your facility currently using? 47
Figure 38: Is your coding system automatically connected to your EMR/EHR system to allow for automation? 48
Figure 39: On average, what percentage of your patient cases is billed to the following? 49
Figure 40: Why are the majority of claims declined? 50
Figure 41: How are research investigations most commonly tracked? 51
Figure 42: Which type of device do you most commonly use for capturing/scanning paperwork during the following processes? 52
Figure 43: How many of the following devices do you have in your area? (Means) 53
Figure 44: How important would you consider each of the following goals/objectives? 54
Figure 45: How time/resource-intensive would you consider each of the following processes? 55
Figure 46: How time/resource-intensive would you consider each of the following processes? 56
Figure 47: How would you rate the level of automation for each of the following processes? 57
Figure 48: How would you rate the level of automation for each of the following processes? 58
Figure 49: For the processes that you have been able to highly automate, which improvements have you seen? 59
Figure 50: How much improvement have you seen for each of the following benefits? 60
Figure 51: To what extent do you agree that processes could be improved with additional scanning hardware technology? 61
Figure 52: To what extent do you agree that the following processes could be improved with additional scanning hardware technology? 62
Figure 53: To what extent do you agree that the following barriers can slow down processes? 63
